

Planning NIEM to OASIS Open Project Transition

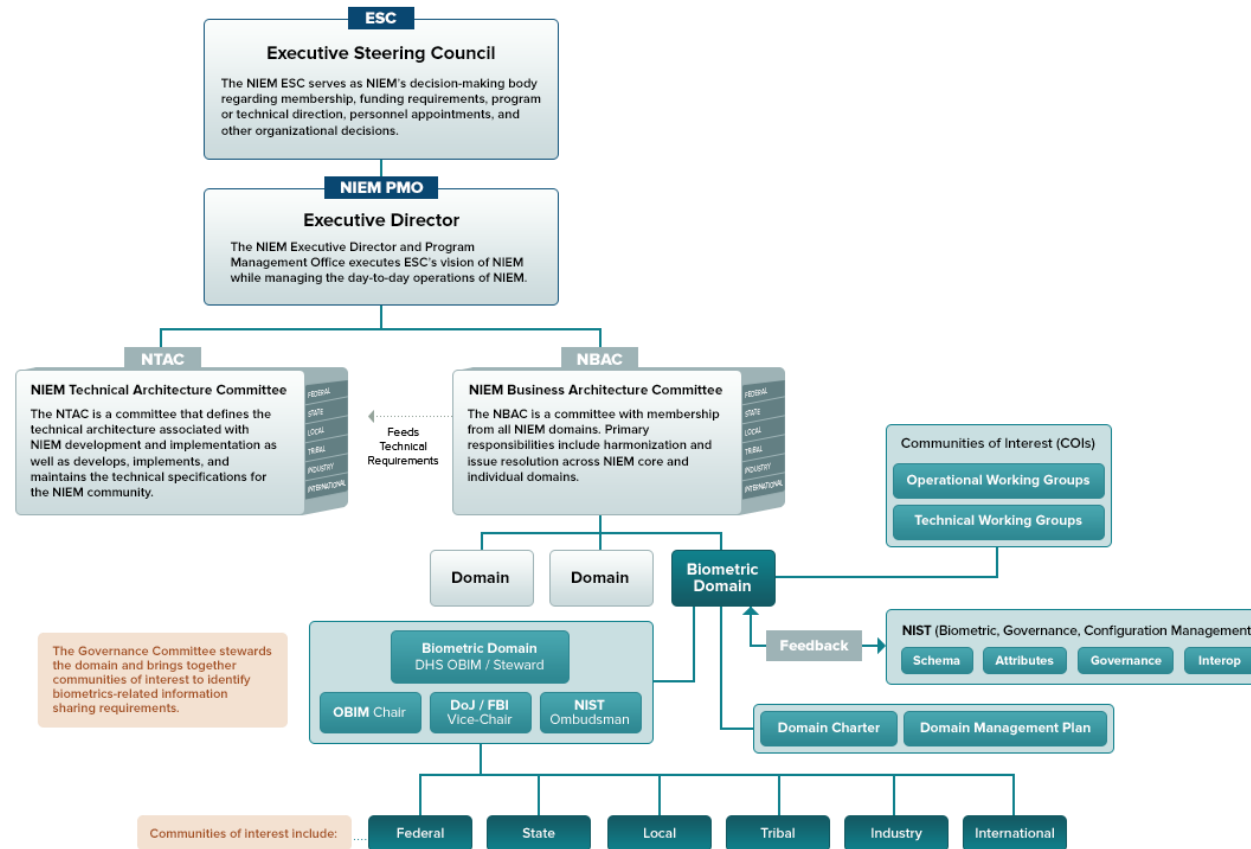

Goals today

- Introduce everybody
- Answer your questions
- Start brainstorming a plan for transitioning NIEM assets and organization to an OASIS Open Project

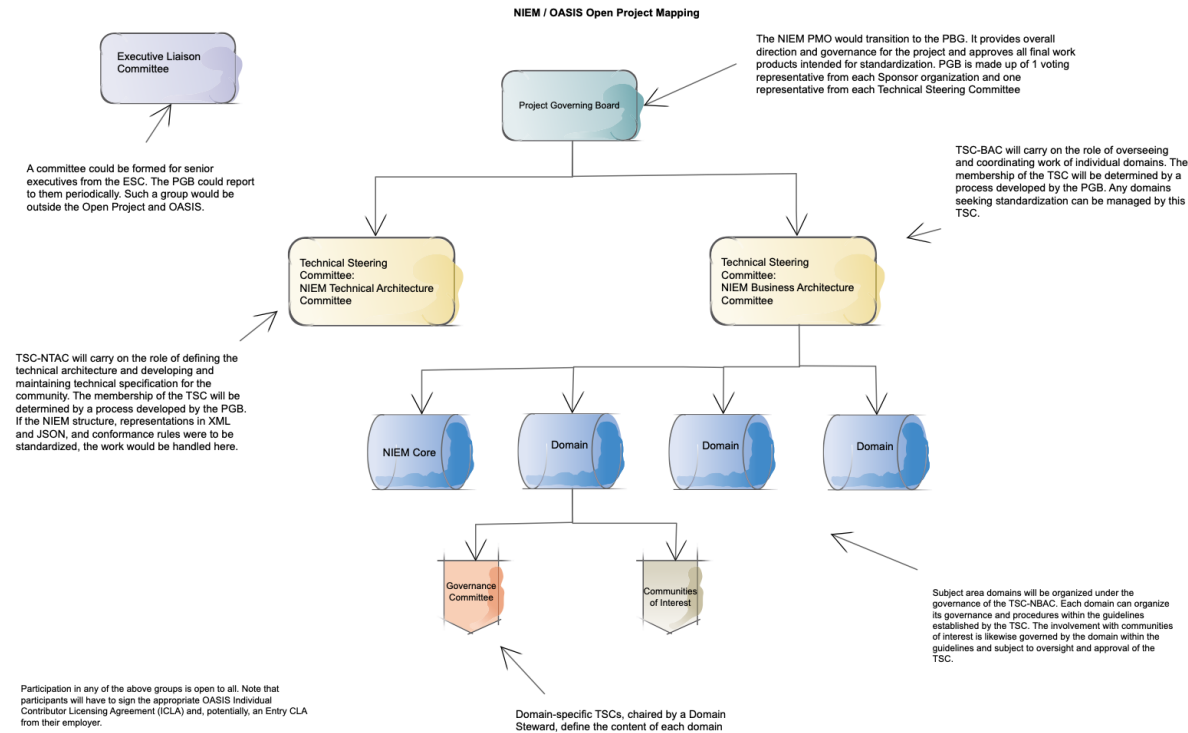

Reminder: who are you guys again?

- Nonprofit, member-driven standards development organization
- Built on openness, inclusivity, and innovation
- Development agenda driven by our diverse technical communities
- International membership
- Liaison relationships many international standards development organizations: ISO, IEC (JTC 1), ITU
- Member of European Multi-Stakeholder Platform on ICT Standardization which enables OASIS specs to be referenced in EU public procurement and regulation
- ANSI-accredited standards development organization

End state: what does a NIEM Open Project look like?

End state: what does a NIEM Open Project look like?

Progress to date

- Decision was made to move NIEM into the public sphere
- OASIS was selected from various approaches considered
- OASIS joined Katherine on presentations to key stakeholders
- ESC gave final approval to proceed at NIEM annual meeting
- Katherine working with JS Contracts and Legal to be Sponsor #1

What do we need to do now?

- Finish and submit final NIEM Open Project Charter to OASIS
 - This triggers formal announcement of the OP to OASIS community
 - OASIS will also use this in recruiting efforts
- Identify the transition team: people/roles

OASIS	NIEM
Carol Geyer	JSJ6 NMO Katherine Escobar JSJ6 NMO Beth Smalley JSJ6 NMO Shunda Woodhouse JSJ6 NMO Lanzo Wallace
Chet Ensign	NBAC Co-Chair Kamran Atri NBAC Co-Chair Thomas Krul
Claudia Rauch	NTAC Co-Chair Dr. Scott Renner NTAC Co-Chair Mike Hulme

What do we need to do now?

- Establish project plan of action with milestones (POA&M)
 - Document timing and dependencies for making changes
- Gather and prepare OASIS and NIEM governance/process documentation (Transition Team)
- Identify the assets (GH repos, websites, mail lists, etc.) that will transfer to the Open Project (Lead Developer & NMO)
 - Including which will physically move and which will just be branded as OOPs
 - Including how to manage the move to avoid disruptions to the work of the larger NIEM community
- Write down the steps and effort required to transfer each asset or set of assets (Lead Developer & NMO)
 - Plot out timeline for the transition of the physical assets (NIEM Model, documentation, etc.)

What do we need to do now? Cont.

- Prepare a communication plan (OASIS & NMO)
 - Who needs to be notified of what happening when
- Recruit Sponsor for NIEM OASIS Project (Transition Team)
 - Develop list of Sponsors
 - Conduct outreach and recruit
- Go to work

Next steps

- Complete charter (NIEM staff w/OASIS support)
- Organize repository for storing documents relevant to the transition (OASIS)
- Identify transition team members (NIEM/OASIS)
- Schedule meetings to begin planning the work (OASIS)
