

NIEMOpen Military Operations (MilOps) Sub-Committee

NIEMOpen is a community-driven standards development initiative producing multiple specifications that are voluntary consensus standards as defined in the OMB Circular A-119, and in compliance with the open-standard mandate in section 12(d) of Public Law 104-113.

MilOps is one of 18 NIEM sub-committees.

The MilOps sub-committee captures and catalogs DoD-specific exchanges, as defined by mission managers and supporting reference model, while providing the governance and framework necessary to develop those exchanges.

Problem Statement: DoD lacks the ability to manage enterprise-level data; impacting interoperability and Globally Integrated Operations.

Purpose: The MilOps sub-committee ("MilOps") provides and maintains unique military operations and mission data components used to define NIEM Message Exchange Packages (MEPs) that satisfies mission critical information sharing requirements within DoD, and/or Federal government agencies, and Mission Partners.

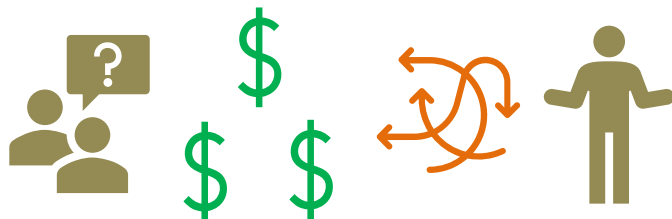

MilOps works towards the alignment of data standards within DoD, aimed at improving the visibility, understandability, accessibility, trust, and interoperability of shared data. MilOps is continuing the development of information exchange tools as a reusable resource within DoD.
