

NIEMOpen Business Architecture Committee (NBAC)

Date and Time - May 21, 2026

Location – ZOOM Hub

AGENDA

1:00 Opening and NIEMOpen general update—Paul Wormeli

1:10 Progress report on the initiation of the forensics domain—Ryan Triplett

1:20 Report on the NTAC NIEMOpen Toolset gaps and recommendations—Brad Bolliger

1:30 Exploring collaboration with the Basic Formal Ontology (BFO) —Brad Bolliger

1:40 Developing data standards for countering UAS technology—Michael Simcock

1:50 Discussion of a potential new domain on financial integrity—Paul Wormeli

2:00 Adjourn

Meeting Minutes Recap

The meeting focused on updates and progress across various domains within the OASIS NIEM framework, including the submission of an ISO certification request, advancements in the forensics domain led by Ryan Triplett, and tooling improvements discussed by Brad Bolliger and Scott Renner from the OASIS NIEM Technical Architecture Committee.

Ryan Triplett addressed key developments in the forensics domain which included the establishment of a GitHub collaboration space for the forensics domain, development of a 1,300-attribute baseline, and ongoing work to identify leadership for various Tiger Teams.

The Technical Architecture Committee reported progress on tooling enhancements including an MCP server, expanded support for semantic flexibility, and plans for API 2.0 completion.

Michael Simcock presented information on counter-drone technology data standards, highlighting the UK's SAPIENT system, its adoption by NATO and DoD, and its potential mapping to OASIS NIEM.

Paul Wormeli discussed on-going efforts with DAMA and the DAMA Book of Knowledge (BOK) and supporting NIEM participation.

The meeting ended with a discussion about a potential new financial integrity domain, with participants noting its relevance to recent White House executive orders and the need for open standards in this area.

Action Items

- Ryan Triplett (Forensics Domain Chair) & Forensics Domain Co-Chairs: Continue identifying and recruiting Tiger Team leads for each sub-discipline within the Forensics Domain and further socialize the baseline attribute list for publication by year end.
- Brad Bolliger & Scott Renner (NTAC Co-Chairs): Continue development and testing of new tools (including MCP server, CMF enhancements for SQL/JSON/XML, and mapping templates. Prepare outputs/demonstrations showing the value of BFO/CCO and RDF integration with NIEM for broader community use.
- Brad Bolliger & Scott Renner (NTAC Co-Chairs): Support the ISO certification process for NIEM Open by preparing necessary supporting detail and engaging in follow-up conversations as the process moves forward.
- All NBAC Members: Participate in upcoming user survey (coordinated with IJIS Institute) to provide input on business needs, model requirements, and future directions for NIEM Open, especially regarding Release 7.0 and emerging technologies (e.g., AI, ontologies).
- Paul Wormeli, Kamran Atri, Thomas Kroll, and interested NBAC members: Investigate the feasibility and potential stewardship for a new Financial Integrity domain, including identifying a suitable agency/organization to act as steward, and develop recommendations for governance and community engagement.
- All NBAC Members: Consider and propose potential new sponsors for NIEM Open, especially now that DOD funding has ended, and communicate suggestions to leadership.
- All NBAC Members: Volunteer or provide input for participation in the DAMA focus group and/or writing contributions for the new DAMA Book of Knowledge to ensure NIEM Open is well represented.
- Michael Simcock: continue mapping efforts for Counter-UAS information messages to NIEM and ontologies

Attendees: 20 attendees on ZOOM Call
